IMTEF Saylor Academy Setup and User Guide

Introduction

Members of the International Union of Bricklayers and Allied Craftworkers (BAC) and their families can access Saylor Academy courses through a partnership with the International Masonry Training and Education Foundation (IMTEF). With nearly 100 courses to choose from, you can work at your own pace to build skills in areas that matter to you, all while earning tuition-free college credit. See a sample of our offerings below.

Setup/User Guide

College Credit Partners	We use math in our daily activities as part of almost every career you can imagine, from business to cooking, farming, or medicine. Many consider math the "universal language", since people across the world use the same numbers, formulas, and equations to help them navgate their lives. In this course, we will study fundamental math concepts and howy ouc an use them in your life.	
	For example, we use fractions when we make measurements, configure ratios, and calculate proportions. We use decimals and percentages in finance, measurement, and weight. In this course we also study how to represent data visually, such as with bar graphs, ing per charts. Graphs and charts. Graphs and charts convey data quickly to an audience. We also explore how to interpret data to help you make sense of charts, like those that outline interest rates, so you can calculate how much more you will need to pay off a loan. Math can also be fury ou need to understand statistics to create a winning franks football team.	e
